Profile

Frontend Developer with project experience building responsive websites using HTML, CSS, JavaScript, and Supabase – including an e-commerce platform that cut ordering time by 40%. Interested in Technical SEO, with core knowledge of site structure, page speed, and crawlability using Ahrefs.

Work Experience

- Web HaydayShop (Gameshop)**
Web Developer | 2026
Tools: **HTML, CSS, JavaScript, Supabase (PostgreSQL), Vercel**
 - Reduced customer ordering time by 40% by replacing manual processes with a self-service online store, successfully handling over 1,920 processed orders.
 - Enabled real-time inventory and order tracking via Supabase, ensuring seamless admin full visibility without manual updates.
- Personal Portfolio Website**
Web Developer | 2026
Tools: HTML, CSS, JavaScript
 - Built a fully responsive personal portfolio to showcase projects clearly across desktop and mobile devices to recruiters and clients.
 - Designed smooth scroll-snap navigation and an intuitive contact modal, allowing visitors to easily browse projects and connect directly.
- Coffee Shop Website (Figma to Web)**
Frontend Developer | [ได้ผลแล้ว]
Tools: HTML, CSS, JavaScript, Figma, Vercel
 - Converted a Figma design into a fully responsive coffee shop website, ensuring pixel-accurate layout across desktop, tablet, and mobile breakpoints.
 - Deployed the site on Vercel with clean, semantic HTML/CSS structure, achieving fast load times and smooth cross-device user experience.
- Machine Vision Development Using AI Edge Computing**
Hardware Designer & Programmer | Jul 2024 – Oct 2024
Tools: SolidWorks, Blender, Python, PLC, Sensors
 - Developed a machine vision system using AI edge computing to control a Delta Arm robot, enabling precise, automated pick-and-place operation without manual input.
 - Resolved mechanical and detection inaccuracies through iterative testing, resulting in smoother arm movement and more reliable vision-based control.
- Production Engineer Assistant – SEWT-E, Korat**
Internship | Feb 2026 – May 2026 (4 months)
Tools: PLC Programming, C/C++, Python, Data Integration, Sensors
 - Programmed and optimized PLC logic for the Anzen machine quality-improvement project, reducing inspection errors through code-driven automation.
 - Developed and tested scripts to process sensor data, improving system communication and ensuring real-time hardware-to-software integration.
